SUMMARY

Full-stack software engineer with 4 years of experience building web products in React and comfortable owning features from API design through polished UI. Interested in developer tool data-informed product work, and clear documentation.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, HTML, CSS, Tailwind CSS, Vite

Backend: Node.js, Express, REST APIs, FastAPI

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Postman, Docker

Practices: unit testing, code review, agile collaboration

EXPERIENCE

Software Engineer @ Northline Apps, Remote

January 2023 - Present

- Built and maintained a React + TypeScript dashboard used by 8,000 monthly active users.
- Designed REST APIs in Node.js and PostgreSQL for billing and notification workflows.
- Reduced average API response time from 420ms to 180ms by adding indexes and query review
- Wrote Jest and Playwright tests covering checkout and account settings flows.
- Partnered with design to ship a responsive settings redesign used by customer success.

Junior Software Engineer @ Cedar & Pine Studio, Oakland, CA

June 2021 - December 2022

- Implemented marketing site and client portal pages in React and Tailwind CSS.
- Created a Python script to clean CSV exports before loading them into MySQL.
- Documented API usage in Postman collections for incoming contractors.
- Participated in weekly code reviews and sprint planning.

EDUCATION

B.S. Computer Science @ Bayview University, 2021

Relevant coursework: Data Structures, Databases, Human-Computer Interaction

PROJECTS

ShelfMark @ personal reading tracker

- React frontend with a FastAPI backend and PostgreSQL storage.
- Users can tag books, filter by status, and export a reading history CSV.
